

ANALYSIS & FINDINGS OF BASELINE SURVEY CONDUCTED FOR IMPLEMENTATION OF MOBILE HEALTH CARE PROGRAMME FOR THE COMMUNITY WITH FOCUS ON ELDERLY HOUSEHOLDS

UNIT: DHAULASIDH (MMU MIS LOCATION CODE: 1232)

Dhaulasidh H.E. Project Background

The Dhaulasidh Project with a generation potential of 66 MW is located on River Beas, part of the Indus basin, in Hamirpur district of Himachal Pradesh in North India. The project is designed as a run of the river project with a small live storage that would be utilized for peaking power during the lean season. The Dhaulasidh project design holds potential of generating 253.18 million units of electric energy each year.

A Memorandum of Understanding for execution of Dhaulasidh project was signed with the Government of Himachal Pradesh on 27th October, 2008.

Geographical Coverage of the MMU:

Analysis of baseline

A total of 2766 households were surveyed in Dhaulasidh MMU covering five blocks of Kangra and two blocks of Hamirpur districts in HP. Of the total households surveyed, nearly 81% are people living APL and the remaining 19% are BPL. The caste-wise spread indicates a major proportion of people belonging to general category (64%), followed by Scheduled caste (22%) and Other Backward Caste (14%).

Approximately 17% of the population belongs to elders (people above 55 years of age). The gender distribution shows approximately 43% of the non-elders as males and nearly

40% as females. However, the gender distribution of elders shows slightly greater for females when compared to male elders. It can also be seen that more than 9% of the elders belong to the age bracket of 55 to 65 years. These are illustrated in Fig.1,2 and 3 below.

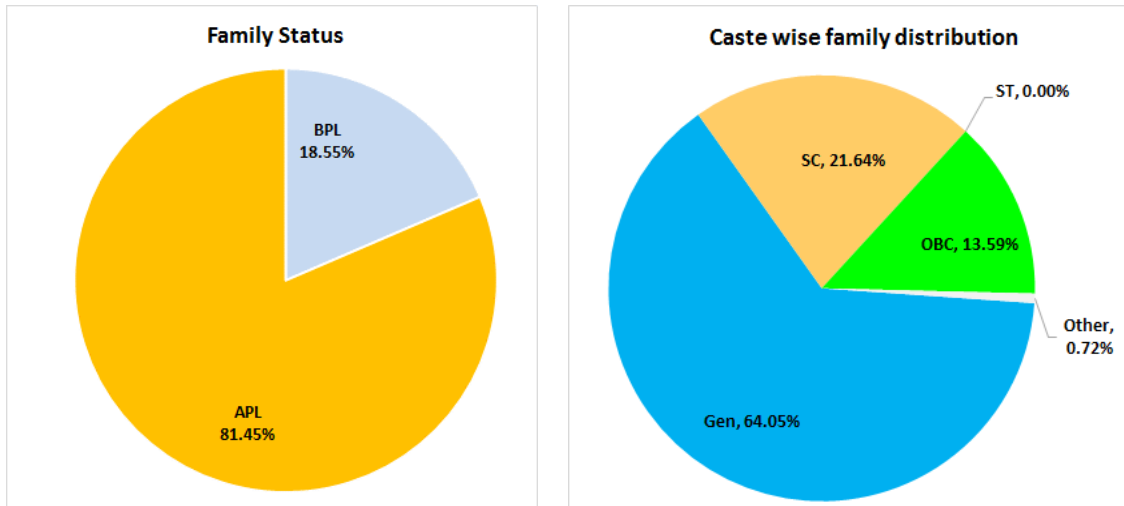

Figure-1: Economic and caste wise distribution of households surveyed

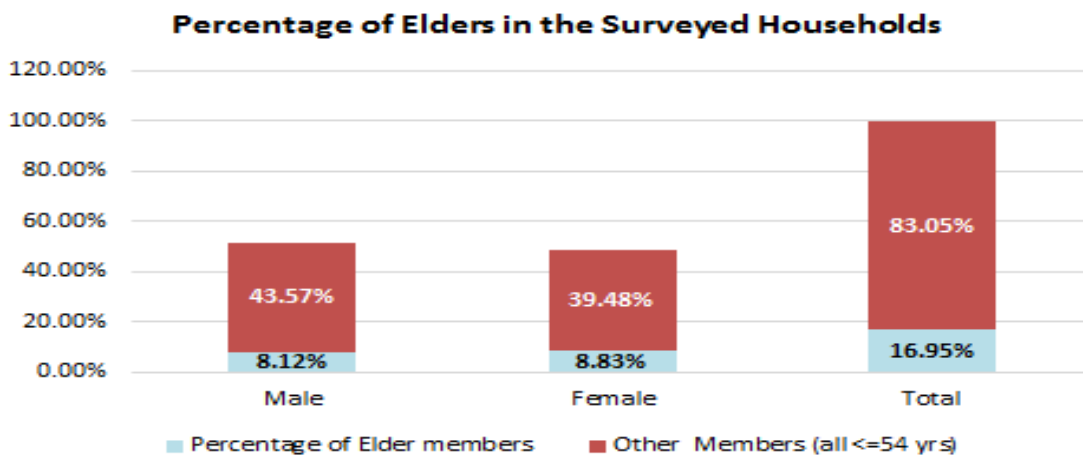

Figure-2: Percentage of Elders in the Surveyed Households

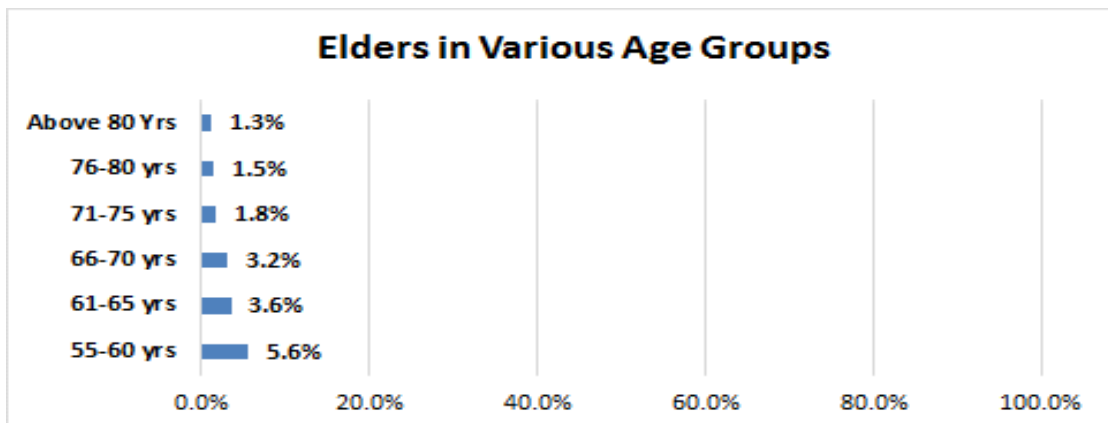

Figure-3: Percentage of Elders in Various Age Groups

Educational Status of Elders

Available data on educational status reveal that the proportion of illiterate is higher than the literate (52 and 48%). Among the literates, nearly 14% completed matriculation, and a majority of 32% did not complete school level education. Only 4% of the population have completed more than matriculation level education. More detailed data is presented in Table 3.1 to Table 3.8.

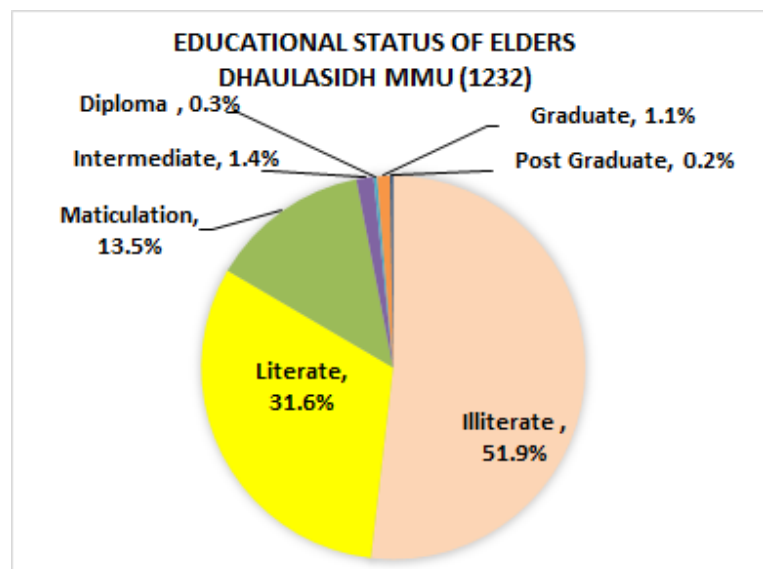

Figure-4: Educational Achievements among Elders

Economic profile of people covered by Dhaulasidh MMU

As said above, majority of the people are in higher income brackets. Also, there are about 30% of the population who are in very low income brackets from Rs.1500 to less than Rs.5000 per month. Similarly, another 30% between the income bracket of Rs.5000 to Rs.10,000/- per month who would benefit by the MMU services. The income category of people is given in Fig. 5 below.

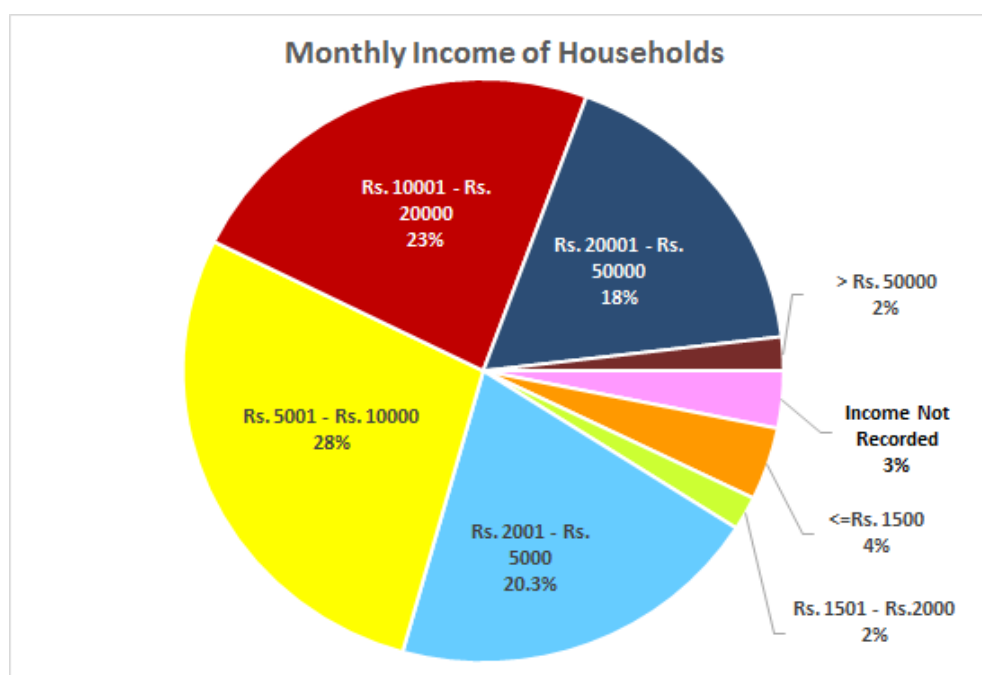

Figure-5: Monthly Income of households

Working & Non-working Elders

Nearly 25% of the elderly (>55 years) are engaged in one or the other kinds of economic activities. Women elders are generally found non-working with only 2.5% engaged in economically productive activities. Amongst the working elderly, many are found engaged in daily wage work, service and farming. Details are given in Table 3 and 4.

Table-3: Working Elders

Disability

Over 2% elders have disability of some kind or the other. Joint and leg pain tops the disability (approximately 1%) followed by mental health issues and blindness. Elders also suffer from hearing and speech problems. Further details are available in Table 5.1 to Table 5.7 and Fig. 6.

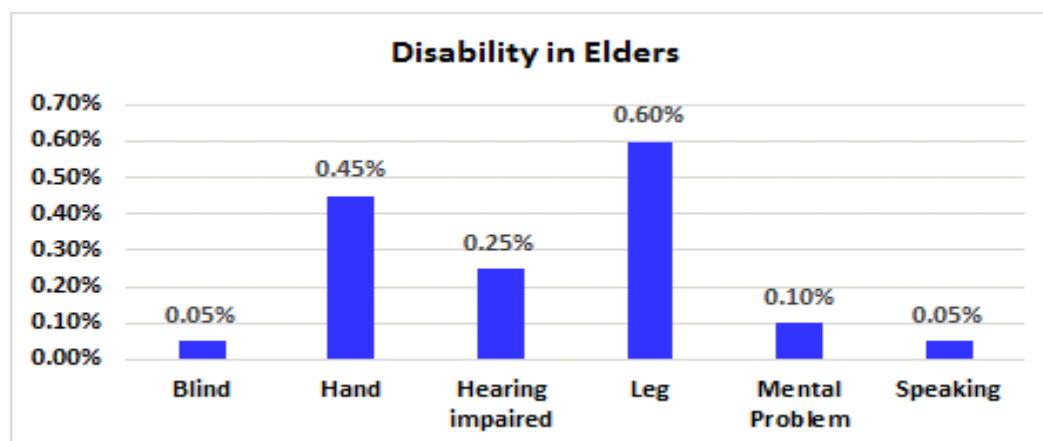

Figure-6: Disability in Elders

Habits among Elders

The analysis of habits of the elderly revealed that almost 23% of the elderly have smoking habits, over 13% use alcohol. Use of Tobacco and related products was found negligible or almost non-existent. Pl refer to Fig. 7 and Tables 6.1 to 6.8

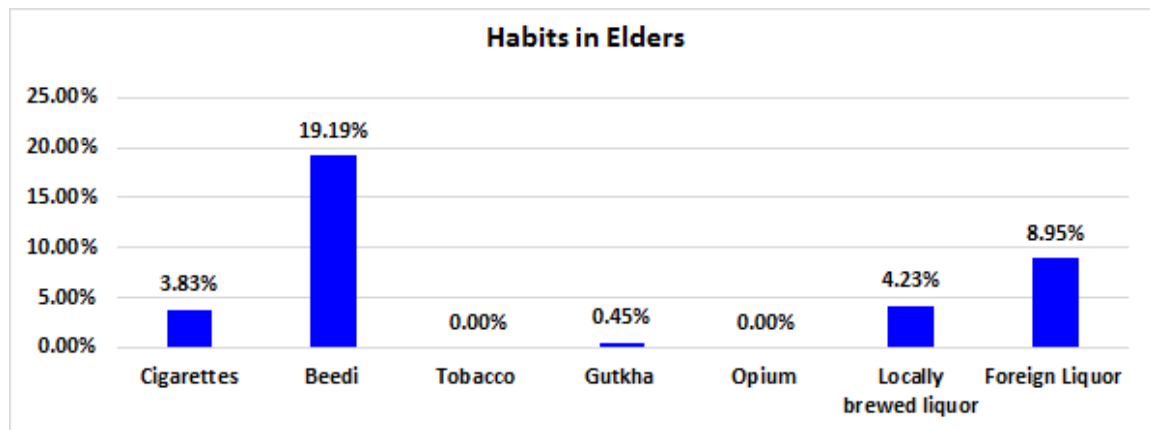

Figure-7: Habits in Elders

Disease Profile of Elders

The analysis of disease profile among the elders shows that more than 32% of the elderly suffer from hypertension and joint pain. Both male and female elderly suffer from these diseases almost in the same number. Nearly 7% suffer from diabetes. Other associated disease morbidity like heart problems 2%, asthma and allergy 5% etc. are also found. Further details are available in Table 7.1 to Table 7.9. These are self-reported disease profile of the elderly. In most cases, the actual disease profile is not revealed during interviews. The MMU performance data and diseases treated could provide a more realistic picture.

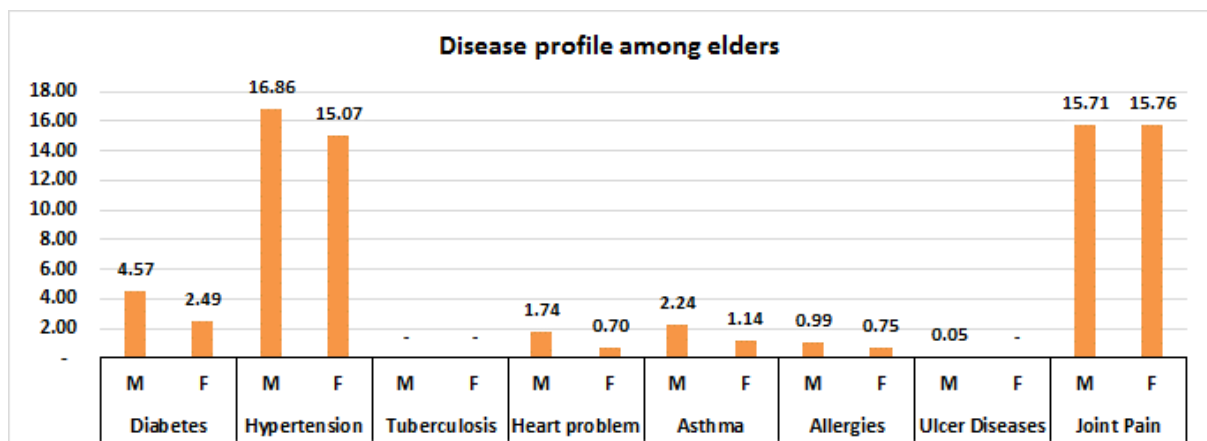

Figure-8: Disease Profile of Elders

Further details on all the aspects related to elders are available in the tables presented below.
